

Ismael Mérida / Architect

The study of Ismael Mérida Arquitectos was born with a clear philosophy, uniting the client's dream with reality through a common thread that is the design architecture and the idea of interior design concepts with Feng Shui and the best professionals and materials.

www.ismaelmerida.com

Provides solutions to all types of projects such as the development of multi-family dwellings or large projects but also in the development of more personal projects such as the architecture of single-family or author houses.

Alfonso Castellón / Architect

Is a creative interior designer with a strong vocation and an extensive university education. He graduated from the University of Granada, with a Bachelors Degree in Architecture where he was awarded a special prize upon graduation. He completed his academic curriculum by enrolling for an Industrial Engineering Degree in the University of Malaga, where he specialized

in electrical installations. His big chance came when he was offered to participate in the construction of the well known Shopping Center "La Cañada" in Marbella. He has also collaborated with Architects in Marbella, and other well known Developers and Builders from whom he has learned the job amongst great professionals and friends.

Enrique Cacopardo / Architect

Architecture studio with more than 20 years of experience in new construction projects, interior design and comprehensive refurbishments, specialized in upmarket housing with a high degree of energy efficiency, in a sustainable and healthy environment on the Costa del Sol.

Their designs meet high standards of quality and comfort, such as the Passivhaus Building Standard or Consumer Building and the Bream sustainability standard.

Joaquín Torres & Rafael Llamazares / Architects

A-cero was founded in 1996 by Joaquín Torres Architects & Rafael Llamazares with the objective of fulfilling their vision of the architecture. A-cero is actually positioned as one of the strongest architectural office in Spain, developing more than 500.000sqm per year in national and international projects.

www.a-cero.com

The scope of our services includes from the urban planning to the architectural development at all stages, including up to the furniture and the interior design. Our self-explaining architecture aspires to go beyond the resolution of functional needs thanks to the form and the constructive coherence. In each project we work to make our vision of architecture and the needs of our clients come true.

BOHO CLUB MARBELLA

By Ismael Mérida Architects

This was a long overdue and necessary project to succeed in Marbella.

Founded by the QUARTIERS PORPERTIERS group, we are entrusted with the remodeling of the Swedish Forestry Center, an emblematic residential of the golden era of Marbella in the 1960s, to turn it into a boutique hotel resort with a Bohemian, artistic, contemporary personality: Boho Club. The assignment looked very good, as it was done together with a group of professionals, who together covered all aspects of the project.

Philosophy: maintaining the architectural essence of its origins, in a wonderful landscape environment.

The challenge: create harmony in a set of scattered buildings, result of continuous reforms and extensions during the last 50 years, which led to loose the original residential idea. To do this, it was essential to enhance the tours and walks in order to organize the whole, thus giving meaning to each building, creating environments, squares, where each bungalow now makes sense.

It was essential to give it a relaxed but elegant Boho style, where the separate bungalow areas and room modules are complemented by the dining areas and other services such as spa, gym, swimming pool, hairdresser, boutiques, etc. where to miss out on paths is a pleasure, where the landscape and its gardens, with wonderful sculptures, exhibit host skills, for a guest who seeks, in the middle of a golden mile, a style and ambiance that will make you feel away from noises, where peace and Boho spirit are the result of every decision taken in the design process, in the process of creation.

The method: fusion, from the old, with the new trends. The contrast between materials: the traditional white plastered of Andalusia's walls, with wood, stone, canyon pergolas...

My favorites corners: The sophistication of the Hang out restaurant: its elegant and urban space. The open space, looking after

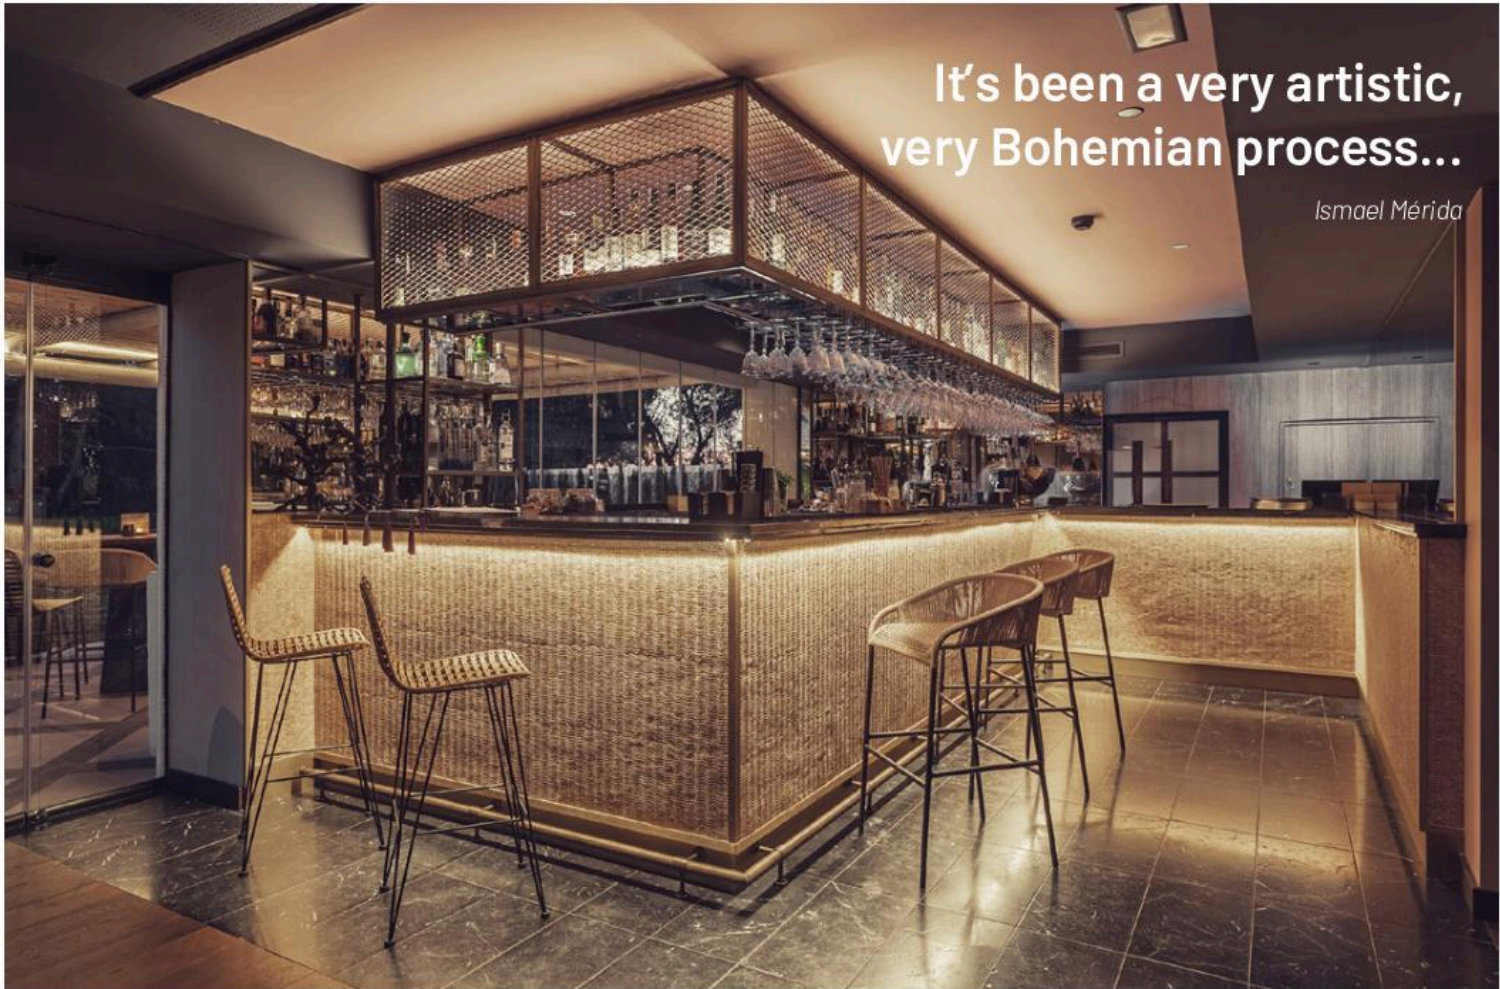

each atmosphere, where the interior has managed to take care of every atmosphere, fresh and welcoming.

The bungalows and their fusion between the vernacular Andalusian architecture and the trendy ambiance.

Plaza spa is a recreation of the squares of Andalusian villages, where its minimalism contrasts with the chosen wood and stones. Here you will find the facilities of the resort.

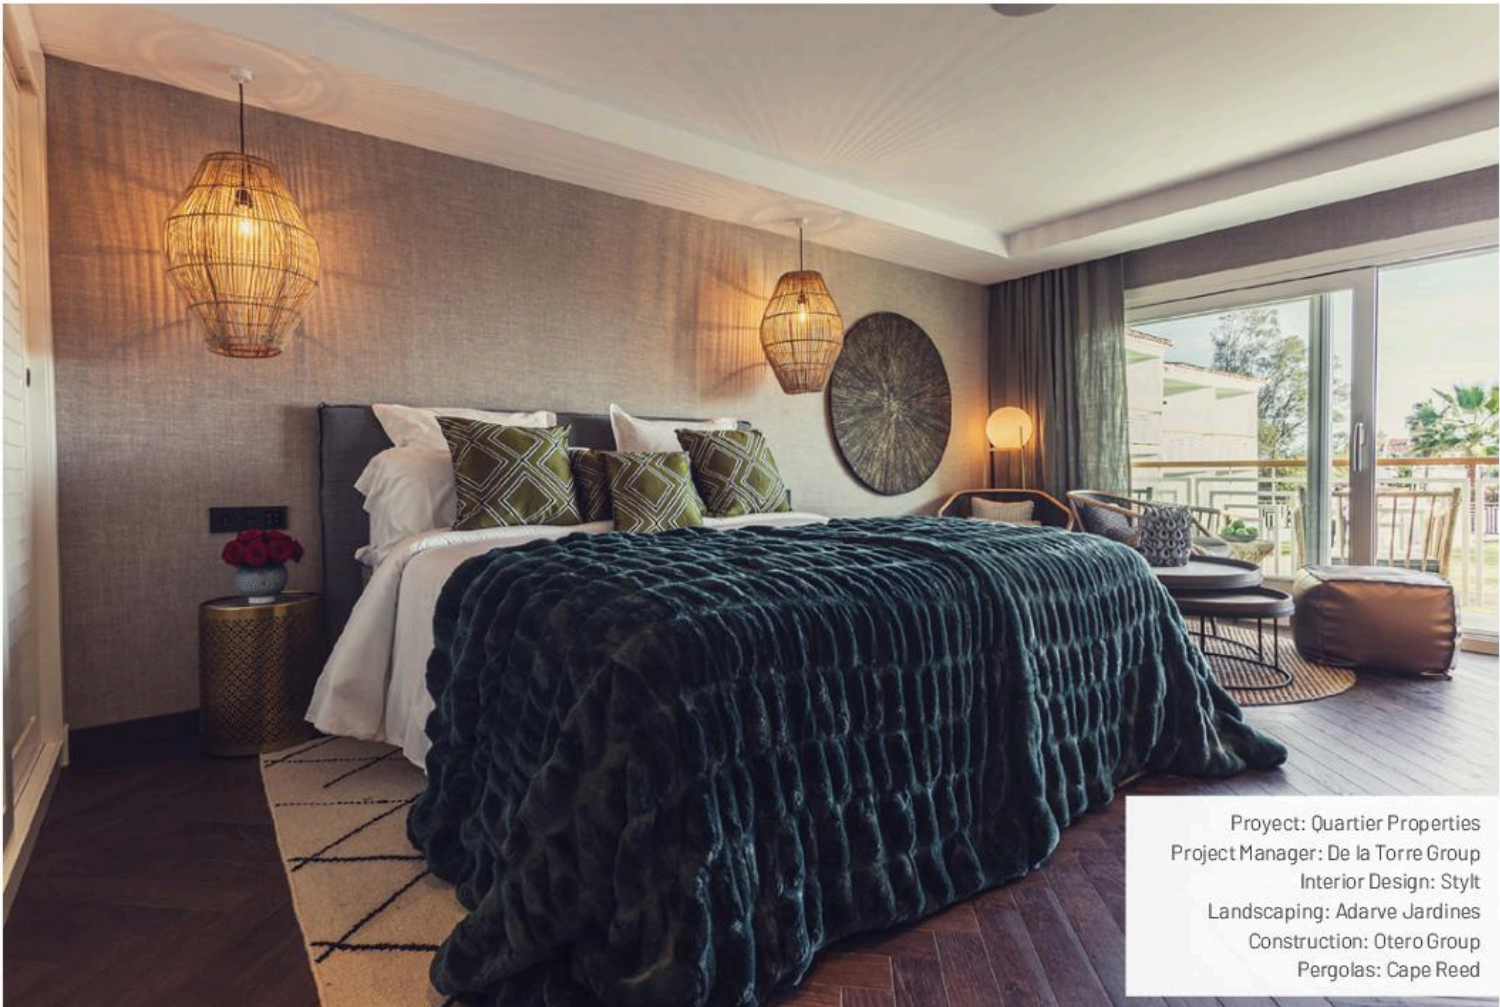

It has been a pleasure to work with great professionals: project manager of de la torre group, stylt interior design, landscape of adarve gardines, otero group construction, cape reed pergolas... and so many more that are not collected in these lines, and of course, the owners, who rarely in my career have seen participating so much in every decision-making, quartier properties.

It was a very artistic process, very Bohemian...

It's been a very artistic,
very Bohemian process...
