

# THE LIST

## RIO REAL, MARBELLA

By Ismael Mérida / Architects

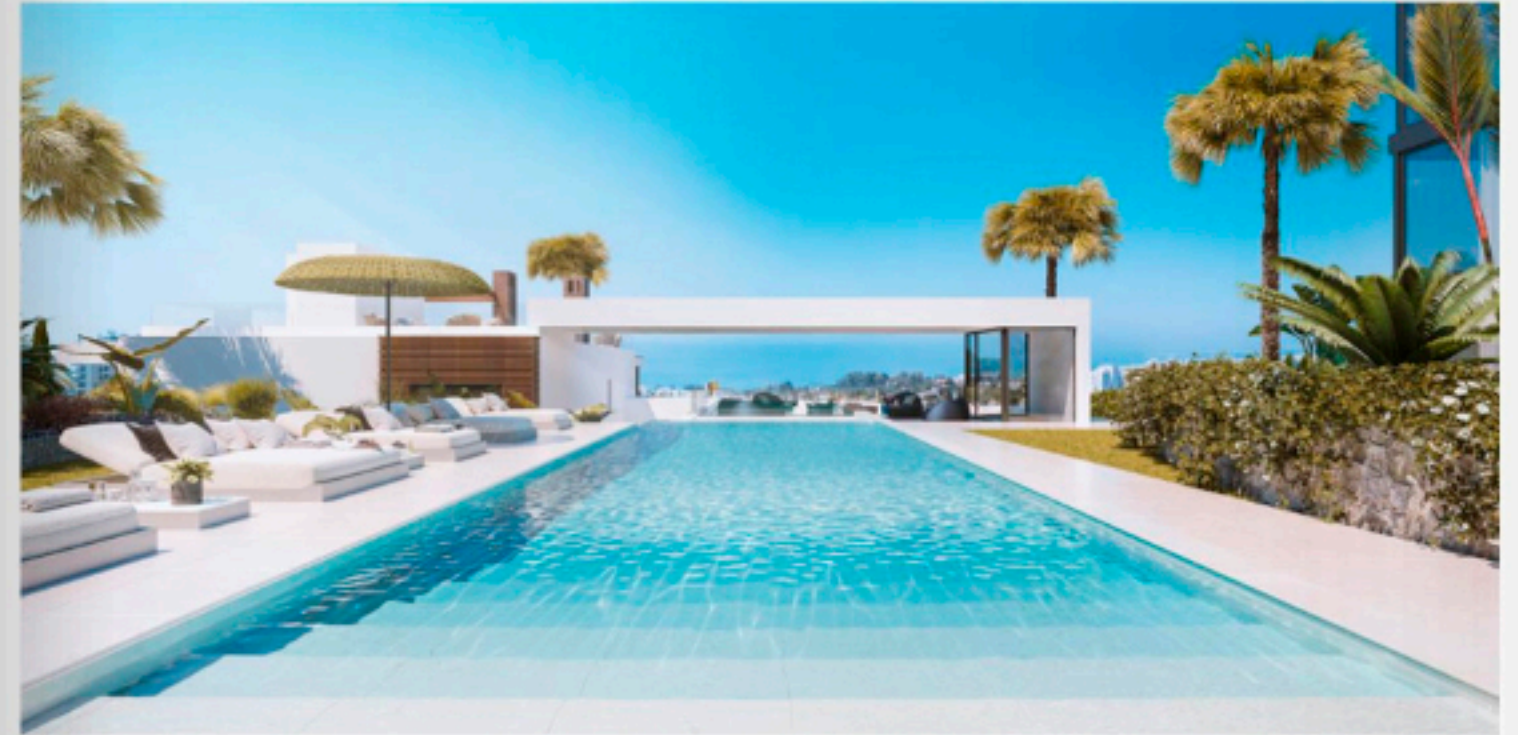

To create a dream paradise that we can call home and design more than a house, a life style. This has been the great starting challenge for The List, a concept created by a team of professionals who faithfully believe in a different product that

comes from many hours and months of long and dreamy conversations, which define what is really the luxury of living in a home that makes us feel a truly special space for each of our unforgettable moments in life.

In a wonderful place where you can enjoy a natural environment, views and the exclusivity and luxury offered by this area of the Costa del Sol of exceptional climate, is located this architecture, white and modern, which reflects the Mediterranean in all its elements, even inside the houses, where the projected geometry is mixed with the natural topography of the gardens.

This is how this complex of 27 dwellings, is implanted and stepped in different levels which ensure the impressive and clear sea views of each one of the projected dwellings, with a construction based on intuitive forms, conceived to regenerate visually and sensorially, with finishes of an excellent level and roof top pool in each unit, as well as a common swimming pool, ample gardens and access roads and a gymnasium with Turkish bath, sauna and social club.

The List has been possible thanks to the work and close collaboration between Ismael Mérida Arquitectos, Revenant Projects lead by José Luis López and A7 Homes with Manuel García.
